"Habitat for Humanity is set to begin construction on a neighborhood of eleven energy efficient homes in West Chicago. The organization plans to complete two homes this year, four next year, and five homes in twenty-eleven. The three-million dollar development also involves the College of DuPage and Com-Ed. The Illinois Housing Development Authority is offering homeowners another source for mortgage relief. It's hosting outreach events later this summer in Peoria and the East St. Louis-area. Homeowners who come to workshops can learn about how to refinance their mortgages."
